

Have you ever tee'd off knowing that at the very moment of contact it felt absolutely perfect - only to be utterly disappointed as you watch the golf ball disappear into the trees or veer off into the rough?

Ask yourself this simple question - am I playing golf with an egg?

Don't play golf with an egg!

The American physicist Dave Pelz (associated with NASA) has studied the physics of golf balls up close and in flight for more than 15 years, and is a noted advisor to professionals around the world. Mr. Pelz has proven that the principle problem regarding the flight of a golf ball is that it is not perfectly round in absolute terms.

We at Rollyx agree with Mr. Pelz. Until golf balls are manufactured in zero gravity conditions such as in outer space, questions will remain regarding the imperfections of a golf ball! As a matter of fact even new, unused golf balls may in some cases not be within the required tolerances that you require.

In short, until golf balls are manufactured on the moon we recommend using the Rollyx Golf ball Tester!

Rollyx Golf ball Tester is the solution.

The Rollyx Golf ball Tester is a user friendly golf aid. You simply insert the golf ball into the cup and turn it with your thumb. If the golf ball moves easily in all directions it is round, if it gets stuck it is deformed.

The Rollyx Golf ball Tester will lower your score and raise your profile. Definitely a "Hole in one"!

At a recent test conducted in England involving 60 participants; all golf balls were tested at first tee. Golf balls shown to be imperfect were eliminated and new golf balls supplied. At the tenth tee all golf balls were retested revealing that 33% were imperfect.

In the multimillion dollar market, this is the ideal advertising vehicle to profile your company, tournament sponsors, or individual competitors. The human eye cannot see the subtle imperfections of a golf ball, The Rollyx Golf ball Tester can!

Rollyx is the perfect solution.

The Rollyx Golf ball Tester is the "state of the art" advertising vehicle as well as a golfer's aid with a precise function, guaranteed to improve any golfer's score.

The Rollyx Golf ball Tester can be used on occasions, such as:

- Golf tournaments
- Golf seminars
- Advertising vehicle
- Corporate gifts

As well as being a golf aid with a well defined function of measuring the perfection or imperfection of a golf ball, it was also designed with potential advertising in mind. A look at the illustrations depicted on this web site will reveal to the discerning eye that ample space for corporate logos and / or sponsors names is provided by the cup itself.

You may engrave the tournament name in the brass ring and the tournament sponsor name or logo can be printed on the cup. The Rollyx Golf ball Tester is recently profiled in international golf magazines and on TV, to rave reviews - destined to become "the on indispensable tool" in every golfer's bag. "The most unique advertising platform yet to be marketed, aimed directly at corporations wishing to associate themselves with golf" has become a common sentiment, expressed amongst marketing professionals.
